Dr. Kevin Pedro
Fermilab
PO Box 500
Batavia IL 60510-5011

Dear Kevin Pedro,

If your application entitled, "Searching for Strongly Coupled Dark Matter at the LHC with Unsupervised and Generative AI," is selected for funding under the DOE SC Early Career Research Program, it is my intent to collaborate in this research by supporting development of inference as a service for detector simulation using Nvidia GPUs and software. Thank you for the opportunity to participate.

Sincerely,

A handwritten signature in black ink, appearing to read "Tom Gibbs", with a stylized flourish at the end.

Tom Gibbs
Manager, Developer Relations
